

# London School of Economics (LSE) Centre Building

London, UK

**Location**  
London, UK

**Date**  
2013 -2019

**Client**  
London School of  
Economics

**Cost**  
£ 78 million

**Area**  
17,500 m<sup>2</sup>

**BREEAM**  
Outstanding

**Structural Engineer**  
AKT II

**Services Engineer**  
Chapman BDSP

**Fire Strategy and  
Acoustic Consultant**  
Hoare Lea

**Landscape Architect**  
Gillespies

**RSHP grasped that this would be a building at once for the university and for the city, an enhancement to public as well as academic space**

Professor Craig Calhoun, Director of LSE

In November 2013, RSHP won a RIBA design competition for the LSE's new Centre Building, London, UK. The scheme is a 17,500 m<sup>2</sup> new landmark teaching and academic building at the heart of the LSE's Aldwych campus, the design of which design is inspired by the schools' core values: Collaboration, Excellence and Innovation.

The original brief called for world-class architecture to match the LSE's international academic reputation and included the demolition and redevelopment of three existing buildings to create a new 10-storey building. RSHP has gone further by designing a new public square located at the heart of the university, creating a new focal point for the school and improving connectivity and wayfinding throughout the campus. The scheme comprises two simple interlocking buildings of 2, 6 and 13-storeys with landscaped roof terraces. The volumes are joined by dynamic circulation and meeting spaces, designed to encourage chance meetings, discussion and collaboration. Innovative and

inspirational spaces to attract the best staff, academics and students have been created by simple, flexible floor plans that provide a mixture of cellular and open plan offices, adaptable teaching spaces and study areas for students. Five academic departments and the Directorate are located on the upper levels which are all naturally ventilated. These floors are linked by a meandering stair which promotes inter-faculty exchange; the stair rises through a series of connected double height spaces which are evident on the main façade flooding the interior with natural daylight and providing breakout spaces to foster wellbeing. The BREEAM Outstanding design is vertically zoned, with the most public and highly-serviced facilities located on the lower levels, these are joined by a 4-storey atrium which links social learning spaces, formal teaching rooms and a large auditorium. Full height glazing to the learning commons and café at ground floor provides animation to the newly-created LSE square and Houghton Street.
